

Please do not implement any proposal that would lessen Indiana's Telephone Privacy Law Protections. If you cannot make a strong federal rule, then don't bother with it, or else let the stronger state rules prevail. We love our peace and quiet since Indiana's rules took effect, and we would not look kindly on any rule that caused our phone to ring more often with sales calls. Come the next election, we would likely vote against any administration that caved in to special interests and weakened our Indiana Telephone Privacy Law.
